

Information Security Policy

Globalsat is one of the largest companies - distributors of technology products, home appliances and office automation in Greece. It is active in the distribution of mobile and IT products, home and small appliances, video and audio, garden items and tools, toys and implements an Information Security Management System according to ISO / IEC 27001.

This security policy ensures:

- The confidentiality of information
- The integrity of the information
- The availability of information
- The training of employees in matters of information security
- Possible breaches of information security will be reported to the Director of Information Security
- A business continuity plan will be maintained
- Legislative requirements will be specified

To achieve the above, the Management supports the information security policy as follows:

- Measurable goals for information security are set
- Interested parties are identified
- The business requirements for the availability of information systems are identified

- The objectives and the importance of these and their achievement, as well as the contractual security obligations of the company are communicated to all those involved in the implementation of the information security management system.
- The Information Security Officer is responsible for maintaining the policy and providing support and advice during its implementation.
- Each party involved in the implementation of the information security management system has clear and predetermined roles and responsibilities.
- The system is inspected at regular intervals under its responsibility
- Management is responsible for setting the criteria for risk assessment and classification
